<b>Veranstaltungsnummer:</b>	<b>53-562</b>
<b>Zeit:</b>	<b>1st. (14tägl.)</b>
<b>Raum:</b>	
<b>Beginn:</b>	
<p><b>Course description:</b>  This bi-weekly course will introduce methods and tools employed in linguistic research. One of its main aims is to provide students with the necessary resources to conduct their own linguistic research projects.  We will cover three main aspects during the semester, namely a) corpus research, b) statistical analysis (with an introduction to R and SPSS) and c) phonetic/phonological Analysis with Praat. Students will be encouraged to work on their own research projects during the semester and employ the methods they acquire over the course of the semester. Depending on student requirements, the course will take place either in German or in English.</p>	
<b>Sprechstunde während der Vorlesungszeit:</b>	<b>Nach Vereinbarung</b>
