

Veranstalter:	Steffen Schaub, M.A.
Modul:	Methoden der Linguistik [ENGAGE M05, LAA8]
Art der Veranstaltung:	Übung
Veranstaltungsnummer:	53-523
Zeit:	2st. Fr 14-16 (14tägl.)
Raum:	(online)
Beginn:	09.04.2021
<p>Course description:</p> <p>Linguists work with all kinds of different data, as there isn't just one way of looking at language. In this course, we will familiarize ourselves with different types of data and methods of analysis currently used in linguistic research. Following an introduction to data and methods in linguistics and basics of planning and conducting a research project, the focus will be on practical exercises in corpus linguistics, the study of language using large quantities of digitized textual data. Further sessions will give an introduction to basic statistics and reporting results. The main goal of the course is to enable participants to conduct their own empirical studies from start to finish.</p> <p>The class will be held online via video conference (on Zoom) every 2 weeks(!) during the course time listed above. In addition, participants are expected to prepare for each weekly session by preparing reading assignments and consulting additional input videos and exercises. All course materials and links will be provided in a course on OpenOlat. The link to the course will be sent via E-Mail (STINE) after the course registration period.</p> <p>The course will be held in English.</p>
