

Veranstalter/in:	Dr. Eva Maria Luef
Modul:	The Mental Lexicon (ENG-4, ENG-4a, ENG-10, ENG-11, AA7, AA9, LAA8, LAA11, IAA20, IAA23, IAA24, IAA25, ENGAGE-M01a, ENGAGE-M02)
Art der Veranstaltung:	Seminar II
Veranstaltungsnummer:	53-516
Zeit:	2st. Mo 14-16
Raum:	Ü35 – 01016
Beginn:	03.04.23
<p>Course Description:</p> <p>The mental lexicon (or mental dictionary) is a language user's mental storage of internalized knowledge of the properties of words. Lexical access refers to the retrieval of words from the mental lexicon, and this includes both word recognition as well as production processes.</p> <p>This course provides an introduction to how lexical memory works, how words are organized and how their semantic and formal knowledge is represented. The main focus will be on orthographic, phonological, and semantic aspects of words. In addition, we will discuss challenges posed by multiple languages memorized by a language user (the "bilingual/ multilingual mental lexicon").</p> <p>Students will learn about various empirical techniques, which are used to investigate the organizational structure of the mental lexicon, including psycholinguistic experimentation and computer modeling. Models of speech recognition and production will be discussed. The aim of this course is to familiarize students with current issues and experimental approaches to the organization and function of the mental lexicon in first and second/foreign language users.</p> <p>Class meetings will consist of lectures, critical discussions, and experimental work. Students will work in small groups to design, conduct and present their own empirical studies. Assessment will be based on project work, an oral presentation (of the project), and a term paper (based on the project). Regular attendance and active participation are expected.</p>
